

Security Self Assessment

Is your IT environment secure? Take our security evaluation quiz and find out. If you answer “no” to even one question, your IT infrastructure may be at risk.

1. Do you have an individual responsible for information security?
2. Do you have an information security policy that is documented and enforced?
3. Do you have a formal incident response team?
4. Do you conduct security assessments of your IT environment?
5. Do you have a security awareness training program?
6. Do you have a password policy that enforces the use of strong passwords for all users?
7. Do you regularly update the virus software for all servers and desktops?
8. Do you use a firewall to protect your internet connection?
9. Do you use multiple physical security controls (badges, escorts, etc.) to prevent unauthorized access to your facility?
10. Do you encrypt transmission of all non-public data using SSL or other industry acceptable methods?

Protection of your network and data should be a top priority. iSecure Solutions offers our world class security experience at rates you can afford. Call us today to obtain a free assessment.
